CHCCA Property Management Report 2026

OVERVIEW / GENERAL MAINTENANCE COMPLETED

- Fulfilled required and additional visits to the Hill without extra charges. Communications: Frequent & on-going communications with Tony / Ontime as needed both on and off season, on-site, calls & texts. Increased and prompt thru opening and closing processes and issues (spring power surge, SLW septic issues, high wind events, etc.)
- Prompt follow up communications and coordination; as needed with CHCCA and sub-contractors for repair work; plumbing issues, septic issues, etc.;
- Individual walkway board repairs, as needed, in sections that have not yet been replaced with new walkways and sections of stairs to SLW, etc
- Several posts and fence slats replaced / Repaired storage room shutter after wind event
- Landscaping: removed dead tree & continued cut back & focus on parking areas, walkways, lights, grills, etc., (folks are encouraged to clear out to their preferences around their own cottages)

CLOSING ’25 & OPENING ‘26

- ***Closing 2025*** went smoothly and within timelines; aside from the initial awareness that there was an issue in the SLW septic that affects SLW 8 & 10 (see below). This required quite a bit of communications starting in Dec and continual follow ups thru winter in attempts to have a fix before opening.
- ***Opening ‘26:***
  - All cottages opened within timeline - except SLW 8 & SLW10 opened by 5/23/26 due to septic
  - Communications with several cottages on various opening issues and next steps
  - Eversource related power surge on Corn Hill Road effecting CHCCA & neighbors - fortunately Tony & MG on site - communications and trouble shooting and on site meeting with Eversource till resolved. Blew out all exterior light bulbs & 2 fixtures - all replaced for opening
- Multiple visits to hill at fall closing & spring ‘26 opening : coordinating/ meeting: FA Days, plumbers, H2O testing, septic sub-contractors,etc.
- Again, minor small repairs done at no extra charge by Ontime/plumber at opening and communications made with Property team (MG/Liz) and owners as needed

SPECIAL MAINTENANCE PROJECT

Completed fall ‘25 - new walkway sections: last long section from #8-11 and section from parking area onto main board walk behind #6 / leveled out attaching areas as needed

Proposed 2027 Special Maintenance Project: Stairs from storage to SLW is priority - then, next remaining 3-4 areas/sections between cottages end fiscal year ‘27 or ‘28

SEPTIC UPDATE: SLW 8 & 10

- An issue was noticed by Nauset Septic during the Dec. inspection /clean out process that occurs every 3 years. It was identified as a possible lift pump issue (since this septic is below the level of the distribution box, it requires a lift pump). This resulted in a “Conditional Pass” with the caveat that the issue would be fixed. A company was initially referred and coordination process began.
- Unfortunately the initial company, after agreeing to come on site with multiple followups, did not. We moved onto another local septic company, Atta Boy Septic, where owner operator Ken came on site, met with Ontime & MG and came up with an initial diagnosis and game plan to get the cottages available asap.
- The issue was not only a pump replacement - that was done in mid may, but with additional sand and back flow in the tank - a secondary temporary fix was instituted by Ken to get the cottages open for the season (including laying of temporary PVC pipe to the distribution tank.with periodic pump outs) This got us thru the high season, with only minimal disruption to SLW 10; as electricity to the pump is thru their unit.
- The present finalization and permanent fix is presently stalled per Ken. This is due to the location on dune, and old pipe issues evidently not recorded properly years ago with the town, permitting , potential conservation concerns, etc.; Our hope is for a least invasive/disruptive fix; whereby next steps would be the laying new pipes to the close by distribution box - rather than large equipment possibly needed to find old pipe break which cameras can’t locate .
- Tony is working with Nauset Septic to help move this along and get the final fix completed.

REMINDERS:

PER EVERSOURCE RECOMMENDATIONs:

1. ***Unplug all lamps/ appliances and shut off all breakers except if connected to smoke detectors / septic alarms / exterior common lights (ie SLW 12 Hunt)***
2. ***Switch out older sub-panels, check circuits working,etc***

GENERAL:

1. Please continue to communicate with either MG and/or Liz regarding any input, requests, or suggestions for Tony & Ontime Property Mgt team that are CHCCA related.
2. Please continue to address individual cottage / Non -Assoc. requests to Tony/Ontime (or other professionals of your choice) directly - Please note/confirm if it is a non association request.
3. Please continue to inform MG and/or Liz when you have an outside contractor and/or property mgt service on-site – especially important in off season. MG/Liz will make Tony aware .
4. Please notify MG if you need to put out any larger trash item that cannot be bagged up and fit in trash bin , so she can assure an available and timely pick up from Seaside. (there may be an extra charge from Seaside that will be passed onto owner

Tony (Ontime Property Mgt) / Margaret / Liz
